Introduction

This report presents the basic trends in domestic travel by Georgian residents for the period of third quarter of 2019. Figures include the results of a household survey conducted by the National Statistic Office of Georgia.

Domestic travel concerns residents of Georgia travelling within the country for a given period, and involves people spending money on activities and accommodation outside of their normal routine and contributing to local economies (Box 1).

The main areas of interest in this report include trips for leisure, business, visiting friends and relatives (VFR) purposes, expenditure during the trip, and other variables.

Significance of domestic travel

Domestic tourism generates significant economic activity and employment in the world, including in Georgia.

Domestic travel spending generated 71.2% of direct Travel & Tourism GDP in 2018, compared with 28.8% for visitor exports (i.e. foreign visitor spending or international tourism receipts)\(^1\).

How many domestic trips do Georgians take?

Georgians took a total of 4.2 million domestic trips in third quarter of 2019, representing 16.4% increase over the same period of last year (Figure 1).

There was a difference in the number of domestic visits carried out by region. Residents of Tbilisi travelled the most, undertaking 31.9% of domestic visits (Figure 1).

Box 1: Methodology To Measure Domestic Visits

In the context of tourism statistics, two simultaneous methods are used for the classification of a domestic visit: location and regularity. The location method takes into consideration the municipal structure of the country. To define the usual environment, it is crucial whether the domestic traveler made a visit outside of his/her municipality. The second method defines the specific frequency of visits that are considered regular. If a Georgian domestic traveler visits another municipality less than once every two weeks, this is not considered regular and is therefore classified as a domestic visit.
What are the main purposes of domestic trips?

The majority of domestic visits were carried out for VFR (45.4%), followed by 16.5% of trips for holiday, leisure and recreation, 11.5% for visit to Second Home, while 11.4% were carried out for shopping purposes (Figure 3).

There are slight differences in the distribution of purpose of visit between the residents of Tbilisi and the rest of the country. 26% of visits from Tbilisi were carried out for holiday, leisure or recreation purposes, while visits for the same purpose were smaller (12.1%) from the rest of the country. 41% of visits from Tbilisi were made to visit friends and relatives, while the same indicator for the rest of the country was 47.4% (Figure 4).
